

About REI...

Radio Engineering Industries, Inc. is a vertically integrated manufacturing corporation located in Omaha, Nebraska with satellite operations in Longwood, Florida and Salto, Brazil. Since 1938, we have made quality, service and value our primary objectives by providing products and services designed with our customers in mind.

What began as an automobile radio service center in 1938, REI now offers an extensive line of quality commercial electronics for thousands of manufacturers, suppliers and operators in the transportation and agriculture industries. Our Audio/Video Entertainment Systems, Surveillance Systems, Radios and Accessories are all made of durable, industrial quality components. We supply quality products to customers throughout the world.

Operating from an Omaha facility of more than 185,000 square feet, REI's full range of electronic manufacturing includes research and development, metal fabrication, printed circuit board manufacturing, automatic insertion equipment for populating circuit boards and electronic assembly. State of the art technology is incorporated into all phases of production, from initial conception and design to shipping the finished product. The entire manufacturing operation is governed by **International ISO-9001:2000 Quality Standards**, ensuring only the highest quality products for our customers, and we stand behind our products long after they are purchased.

Extensive experience developing commercial mobile electronics, combined with our diversified manufacturing capabilities, provide for products that specifically meet the ever-changing needs of our customers.

Founded in 1938, **Radio Engineering Industries, Inc.** continues to grow because of the loyal customer base that has been established and by keeping "*Customer Service and Satisfaction*" as our primary objective and product.
